

# Jose Duque

## Fullstack Developer with Web3 experience

I can build and edit websites with ease using the most recent react packages and using my own customized components tailored for the customer's needs. I've started working on blockchain projects three years ago, having amassed vast experience with Solidity, Web3, Ethereum and Moralis. I'm also highly interested in game development and this has led me to buy various Unity Assets and experiment with them until I began to create games.
