STUART LEE

FULLSTACK DEVELOPER

For more than a decade, I've been employed as a software engineer, specializing in JavaScript, Typescript, and Solidity. My primary expertise lies in React and Angular for frontend development, and Node.js for backend. In terms of backend proficiency, I am adept at constructing APIs using Node.js and GraphQl.

My skillset extends to Ecommerce, Unity, Fintech, Blockchain, and Machine learning technologies. Additionally, I have some exposure to data visualization. I am well-versed in Serverless Architecture, Microservices, PWA, Smart Contract, dApp, and more.

In terms of my work ethic, I am proactive and detail-oriented. I take the initiative to investigate and resolve potential bugs, even if they are unrelated to my current task. My coding practices are meticulous, as I consistently seek out the best approaches.

One of my standout attributes is my flexibility and creativity. I quickly adapt to new environments and possess a keen ability to fulfill their requirements. I am a swift and committed learner who strives to stay abreast of the latest technologies.
